

A better way
to cook outdoors

THE LATEST COLLECTION FROM THE BBQ INNOVATORS

What are CROSSRAY® BBQ's?

CROSSRAY® BBQs are a result of technical innovation and development over 10 years.

The design challenge was to create something "NEW" in the BBQ market: redefining a BBQ to perform like cooking over a bed of red hot coals; providing even heat without flare-ups and to be a true multi-functional outdoor cooking appliance, that produces tastier and juicier food, and so easy.

This is achieved using patented infrared cooking technology and includes both gas and electric versions, in portable, in-built and outdoor kitchen options. CROSSRAY gas BBQ's are the only BBQ that can provide controllable, even heat from 110°C to 350°C+, while using 50% less gas than a conventional BBQ.

Main features of the CROSSRAY technology

World class design and construction, it is built to last using only the best materials.

CROSSRAY

innovation, excellence & quality

Creating the ultimate outdoor cooking experience

A 10-year obsession taking innovation, design, and efficiency to a whole new level.

The dedication and vision of designer Mark Stone – in collaboration with the world famous team at Porsche Design – has seen the quality and performance of the CROSSRAY BBQ recognised as an industry leader.

The ‘Porsche of BBQs’ has many similarities with its namesake – with a sleek and stylish design encasing an efficient and powerful engine unit that goes from 0 to top speed in seconds!

Fundamental to the engine room of the CROSSRAY are revolutionary surface combustion gas infrared burners – the driving force behind an evenly spread heat that provides intensity and sizzle to the entire cooking surface.

The CROSSRAY® is the only BBQ that can provide controllable even heat from 110°C to nearly 400°C, amazingly using 50 percent less gas to achieve these industry leading temperatures.

This intense heat allows the CROSSRAY to redefine the outdoor gas BBQ and imitate perfectly the traditional way of cooking over a bed of red-hot coals.

The additional options of being used as a normal oven, pizza oven, long-slow smoking oven, conventional grill and a traditional wood-fired stove make the CROSSRAY the true definition of a multi-functional outdoor cooking appliance.

The revolutionary design and powerhouse performance of the CROSSRAY BBQ has not happened by chance – with designer Mark Stone leaving no stone unturned in the quest for outdoor cooking perfection.

Mark had a burning desire, a passion if you like, to create something new and innovative in the traditionally staid and unadventurous world of BBQ design.

CROSSRAY has been recognised for its design excellence – receiving a coveted Good Design Award for outstanding product design and innovation.

It is so simple to use – anybody can produce professional-quality cooking with CROSSRAY.

Outdoor Kitchens

the ultimate outdoor cooking experience

Setting new standards in Outdoor Kitchens

CROSSRAY® gives you expert, professional results for the ultimate outdoor cooking experience.

The new CROSSRAY 2B & 4B Series sets a new standard for outdoor kitchens, if you are looking for a high-end outdoor cooking experience, without the price tag.
